IEG4

IEG4 has been enabling digital services for government departments for over 11 years. IEG4 has a customer base of 100+, from small District Councils through to the largest LA in Europe.

All our software is designed alongside our customers to seamlessly integrate with back office systems, to make services more attractive for customer use and more cost-effective through the use of digital transformation, data analytics, robotic process automation, Open Process Workflow and EDMS. Our cloud-based solutions enable you to go live fast, with no need for expensive hardware or requirement to spend money on costly system administration resources.
