KnowledgeBus

KnowledgeBus is a CIPS accredited technology which enables IT buyers to quickly benchmark purchases against daily trade guide price and stock levels on over 150,000 products from more than 2,500 manufacturers. Our range of IT spend analysis tools also help buyers identify, track and forecast market dynamics more efficiently.

As reassurance of the ROI opportunity, we offer a free, no obligation spend analysis on a sample of IT product purchases spanning 12 months. The analysis reveals the actual margins you have been paying, any overcharging and an indication of potential cost savings. Get yours today!
