Azeus Convene

Convene offers smarter working by redefining the traditional board paper meeting experience. Being able to access and annotate your meeting papers on the go and offline, on the device of your choice, fosters a more productive and efficient working environment.

As an advocate for better business efficiency, Convene's presenter mode means meeting attendees can follow a meeting remotely encouraging greater flexibility.

What's more, organising meetings and sorting out post-meeting activities such as approving minutes or tracking actions are streamlined on our platform leaving more time to get work done.

Convene has become the sustainable digital meeting platform of choice for companies across multiple industries in over 70 countries.
