## Public Technology

PublicTechnology is the UK's leading source of breaking news and analysis for anyone interested in how digital, data, and IT is transforming the public sector. We cover everything from central government digital strategy, through to the realities of how technology is changing the work of front-line professionals delivering public services in local government, health and social care, education, and law enforcement. [Visit our site](#) [1] for all the latest breaking news, as well as in-depth analysis, features, comment, and insights from the leaders who are shaping the UK public sector's digital future.
